**Re: Additional Information
Hanson Aggregates Pennsylvania LLC
Rock Hill Quarry
SMP No. 7974SM1
East Rockhill Twp., Bucks Co., PA**

Dear Mr. Menghini:

You have asked Hanson Aggregates Pennsylvania LLC to provide information and documentation further supporting Hanson's compliance with PADEP's annual 500-ton removal minimum requirement.

In response to PADEP's previous request, on January 14, 2019, I emailed scale tickets evidencing the annual removal of at least 500 tons from the Rock Hill Quarry from 2010-2017. Since then, questions have been raised by Senator Santasiero and local press regarding repetitive recorded weights in 2010 and 2011. In summary, the repetitive weights are simply due to the location of and set-up of our weigh scale. For the scale tickets in question, the Rock Hill Quarry did not have an operating scale on site to weigh the outbound trucks. Hanson had a wheel loader delivered to the Rock Hill site specifically to load the annual minimum 500 tons. Hanson has attached PennDOT Special Hauling Permits for 2010 to 2012 and invoices for these equipment transportation services from 2013 through 2017. The loader operator would use his best judgment to load a truck at, but not to exceed, the gross weight limits of 73,280 lbs. for tri-axle dump truck and 80,000 lbs. for a tractor trailer dump body. Then, once this product was transported to our Ottsville Quarry, the truck was weighed and a ticket was issued showing the gross and tare weight of the vehicle, and the net weight of the load. The material removed the last several years included crushed aggregate remaining in former stockpile areas.

Typically, our scale systems are designed to weigh outbound trucks, not inbound trucks. So, if the weight of an outbound truck is over the established tri-axle weight limit of 73,280 pounds, the driver is directed to turn back into the yard and dump enough stone so that it will weigh at or less the 73,280-lb. limit. Based upon my conversations with my colleagues here at Hanson, trucks with gross weights of 73,280 pounds either indeed weighed that amount, or had a weight of 73,280 lbs. manually entered by the scale operator to reflect that the trucks weight had exceeded the limit of 73,280 lbs. Please note that the rock at Rock Hill is unusually dense, so the

weight of a particular volume of Rock Hill aggregate may have been heavier than what the loader was accustomed to. As you can see from our records, in the years following, the loader at Rock Hill was able to account for the dense rock and load the trucks to weigh less than the 73,280-lb. limit.

The tickets are printed in duplicate as a general industry practice so that both the driver of the truck and the ultimate purchaser of the stone (if different from the trucker) each have a copy of the transaction. This printing format is programmed at the computer system level and not under the control of the weigh master. The duplicate tickets were not counted twice, and therefore, we do not understand the concern arising from the duplicate tickets.

You also questioned why the Mine Employment and Production Reports submitted for calendar years 2011 and 2012 only listed 500 tons of production (material removed from the site), when Hanson's scale tickets indicate a greater amount of aggregate was removed. To date, we have been unable to ascertain why the exact amount was not listed. Likely, the Hanson representative preparing the report simply rounded the exact tonnage to 500 tons. Approximately 508 tons were removed in 2011 and approximately 522 tons were removed in 2012.

As the DEP notes in its letter to Mr. Bagenstose, DEP staff determines on a year-by-year basis whether an operator meets the 500-ton minimum by way of routine site inspections. DEP has confirmed that Hanson (or the quarry's previous owners) has met this requirement as documented by the compliance inspection records, lack of any enforcement action and the annual renewal of Hanson's mining license.

Please feel free to contact me at (610) 366-4819 should you require additional information.

Sincerely,

Andrew J. Gutshall, P.G.
Area Environmental Manager

After printing this label:

1. Use the "Print" button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number. Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$1,000, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.
