September 21, 2016

Dear East Rockhill Township Resident,

East Rockhill Township has been informed that North Penn Water Authority (NPWA) found slightly elevated levels of perfluorinated compounds (PFCs) in their wells which serve 194 customers in a development located off of Three Mile Run Road and Hill Road within East Rockhill Township. Enclosed please find NPWA's *Public Drinking Water Notice to North Penn Water Authority's East Rockhill Customers* (NPWA Notice) dated September 21, 2016. The attached NPWA Notice was prepared and sent out by NPWA.

Please note that NPWA's Notice only references the test results for the NPWA wells providing water to NPWA customers. Given the NPWA Notice and the information contained therein, East Rockhill Township residents on private wells should consider having their own well tested to determine if they have any well water issues. The purpose of this letter is to simply notify all Township residents of the well water issue discovered by NPWA at its wells within the Township and to suggest that residents on private wells similarly consider having their private wells tested. Please note that not many companies test for PFCs, so please contact the Township if you have difficulty finding a company that performs the requisite tests.

The East Rockhill Township Board of Supervisors and Township staff will continue to communicate with NPWA in an effort to stay informed of the status of the above-referenced matter. Future communications relating to this matter will be posted on the Township website, monthly enews, twitter and Facebook.

Sincerely,

EAST ROCKHILL TOWNSHIP

Marianne K. Morano
Township Manager
